Patterns and Pathways of Planetary Urbanisation: a comment on a territorial perspective

A portrait of planetary urbanization – Florence (Tuscany)

A cartographic representation of processes of planetary urbanisation of Florence

A new interpretation of the territory that regards the territory as a result of processes of **production and reproduction of specificities**;

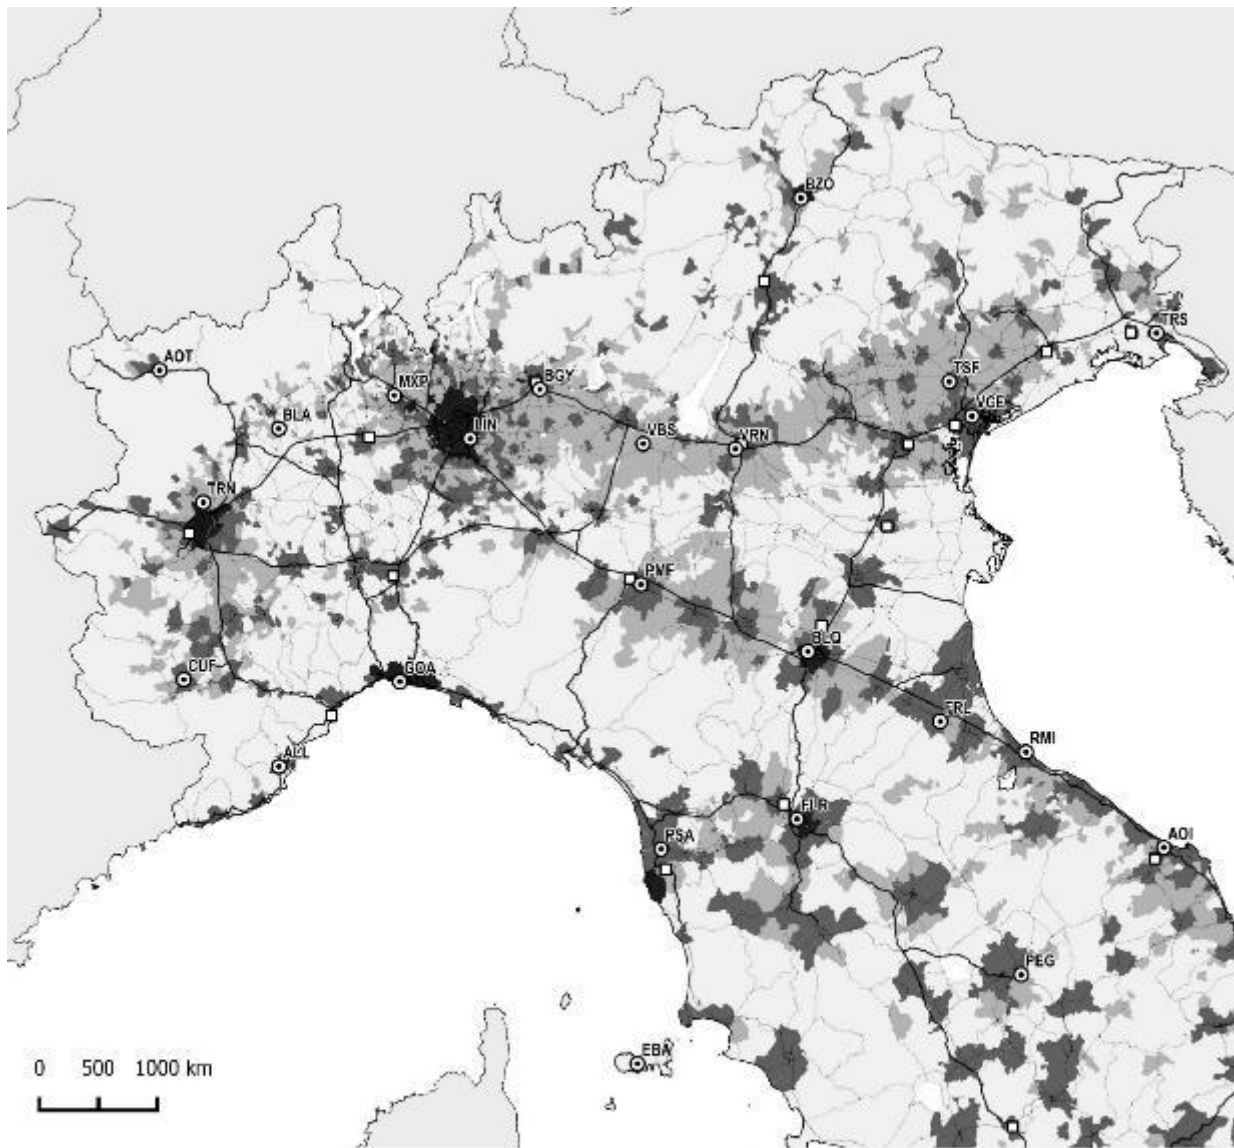

The emergence of **new spatial hierarchies and scales**

The effects of the **regionalisation** of INTE-RCITY cooperations in the strengthening of role of peripheral regions.

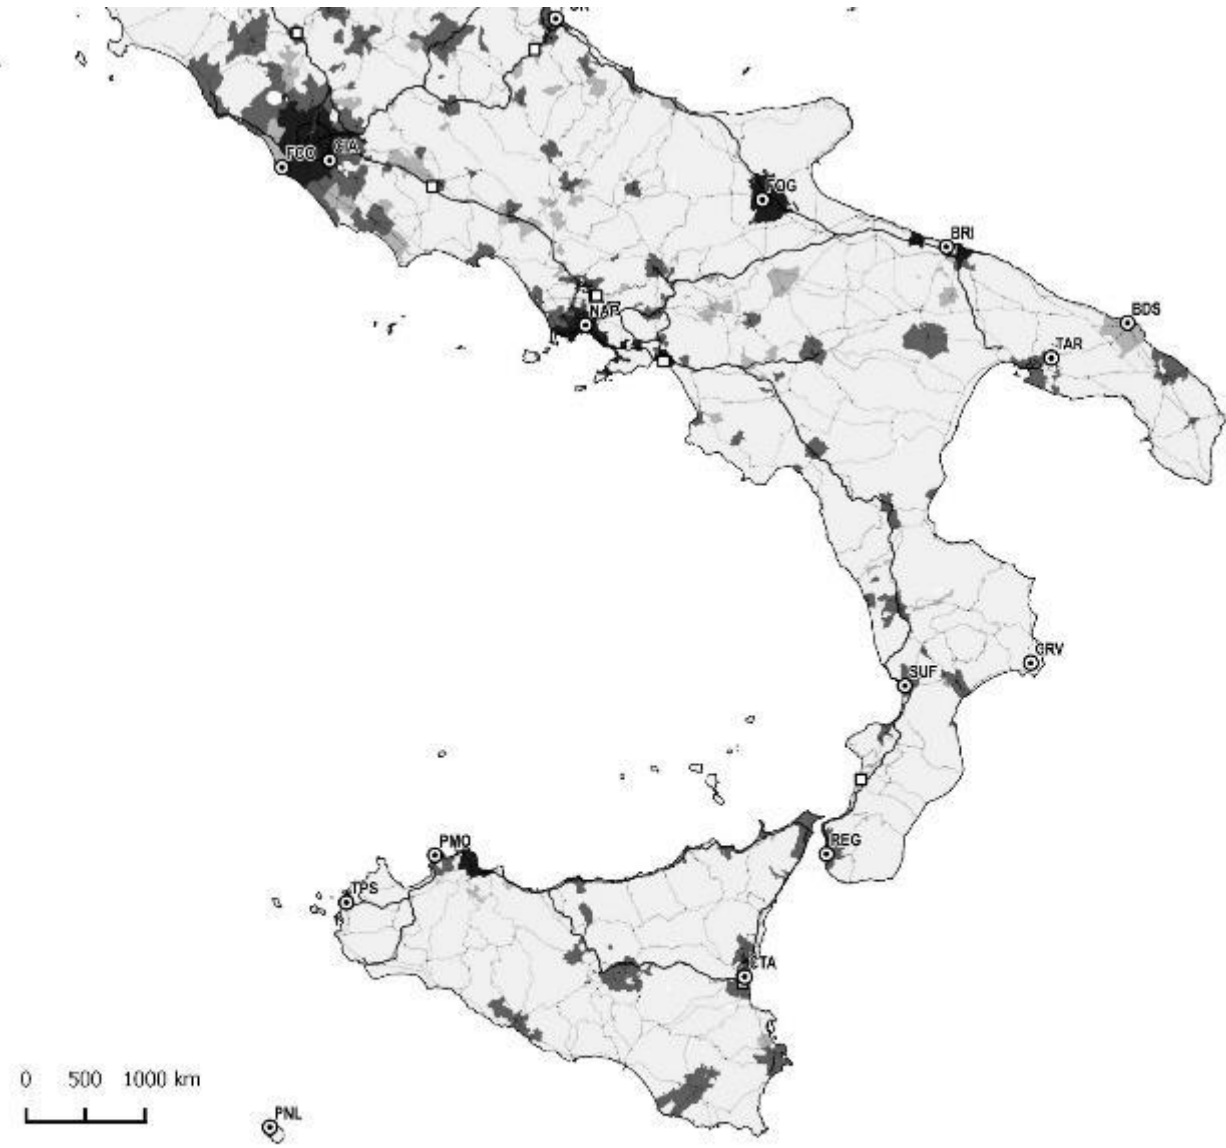

Morphological aspects (that resist) + **Relational** aspects (that move):
inter-city cooperation, mobility, socio-spatial territorial transformations, innovation, economics...

THE EMERGING URBANOID GALAXY

Elaborazione a cura dell'Unità di ricerca di Milano coordinata dal Prof. Alessandro Balducci

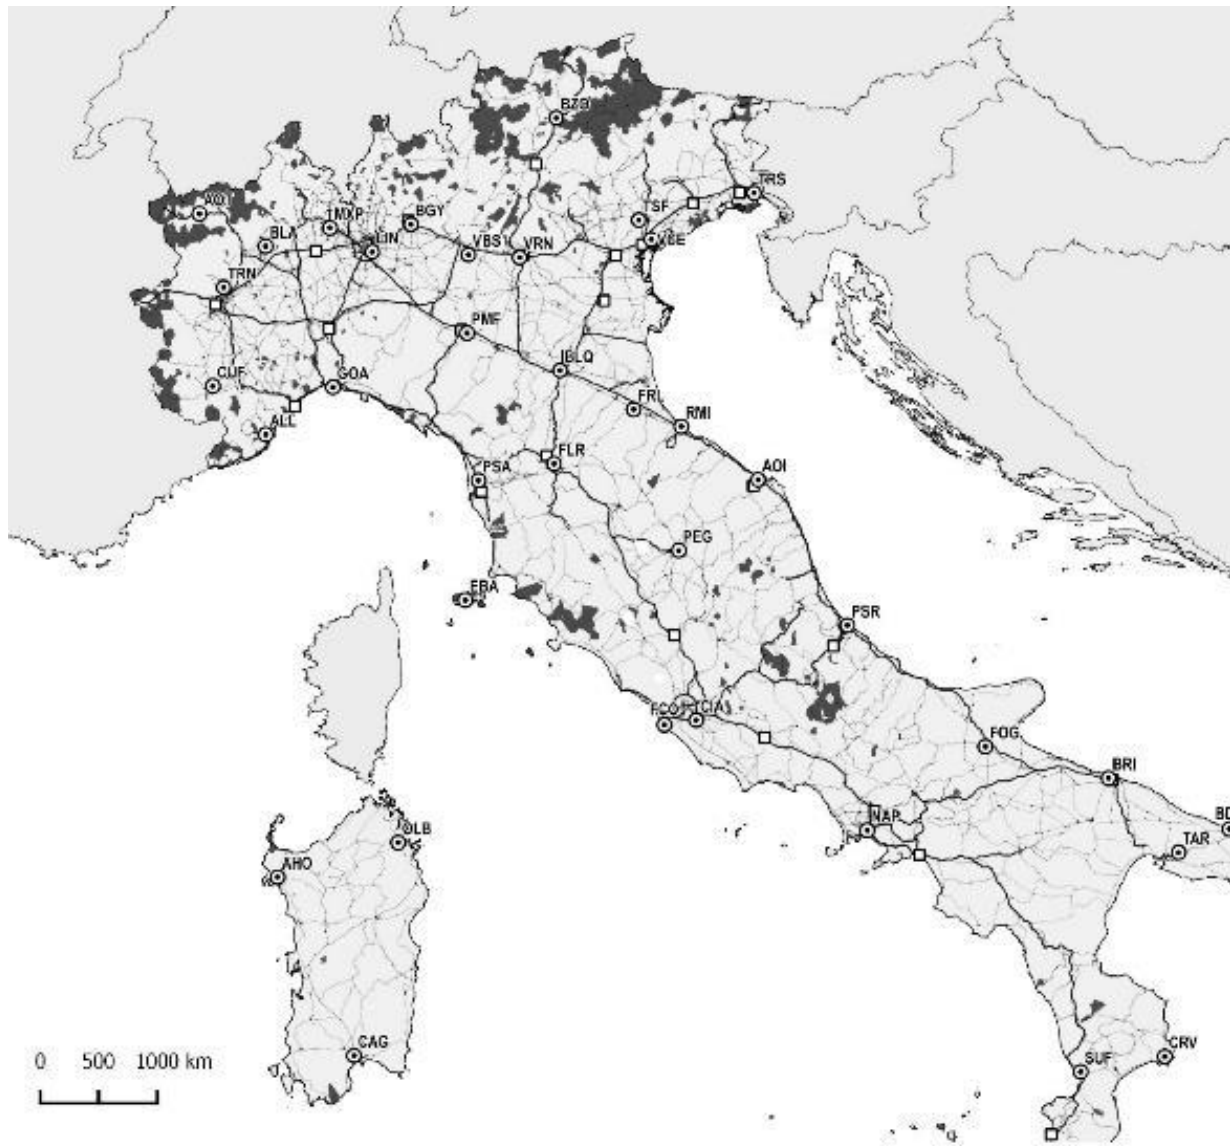

- Agricultural and industrial lowland between concentrated urbanizations
- Mountainous and hilly areas with diversified economic bases
- Airports
- Freight terminals
- Highways
- Freeways
- Waterbodies

- Dynamic coastal and internal hybrid intensive-extensive urbanization
- Airports
- Freight terminals
- Highways
- Freeways
- Waterbodies

MULTIPLE CONCENTRATED AND EXTENDED FORMS OF URBANISATION

Elaborazione a cura dell'Unità di ricerca di Milano coordinata dal Prof. Alessandro Balducci

● Mountains and sea traditional resorts

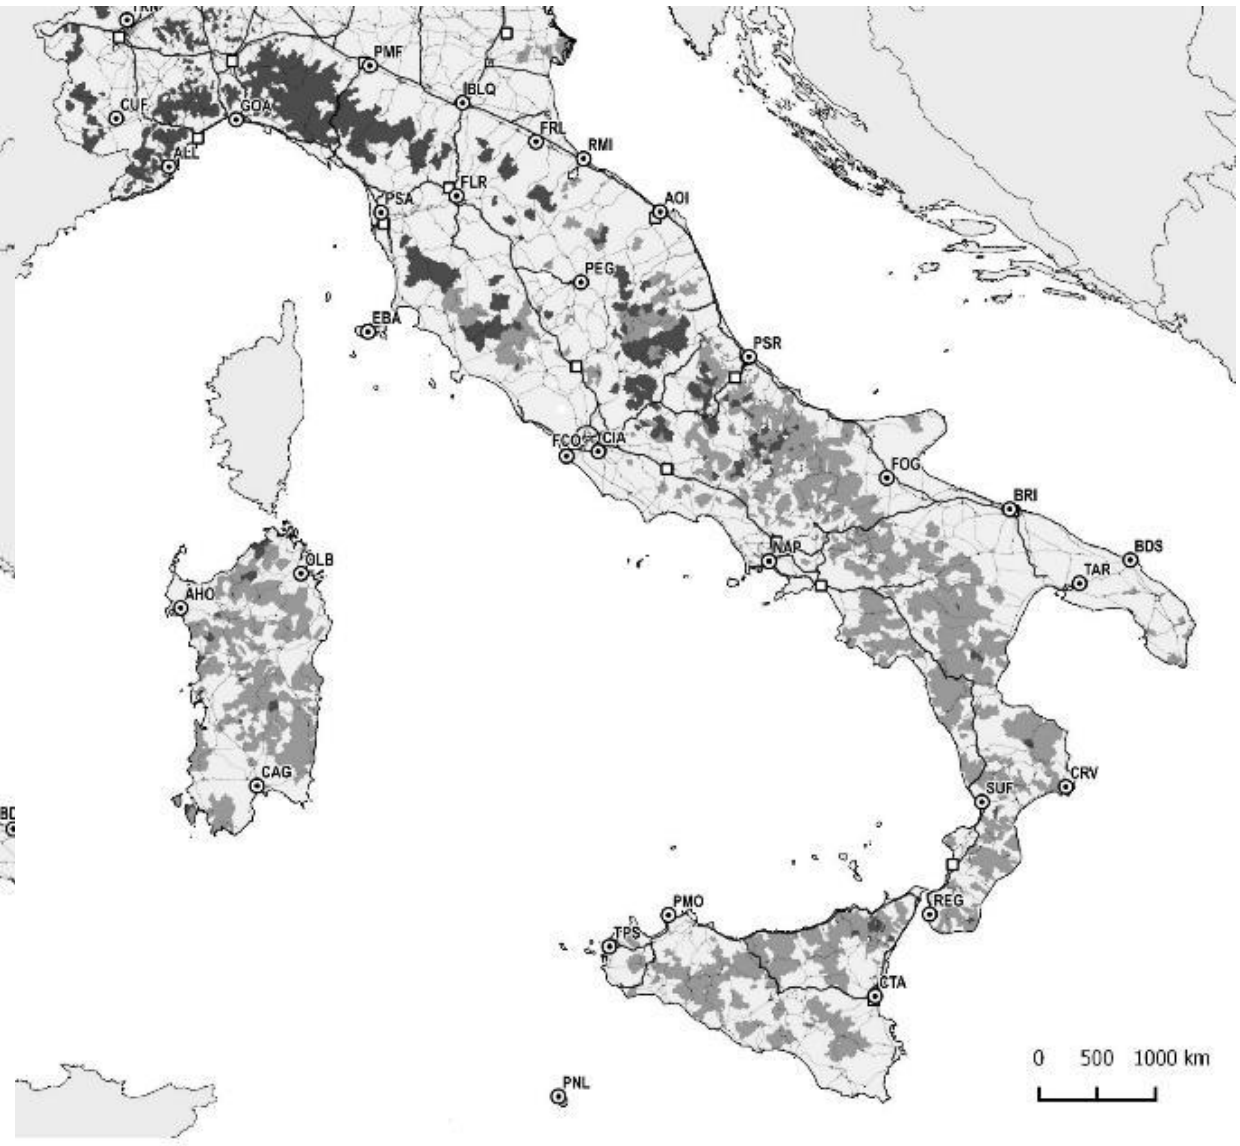

⊙ Airports

◻ Waterbodies

◻ Freight terminals

— Highways

— Freeways

● Quiet rural and touristic depopulating areas

■ Fallow lands

⊙ Airports

◻ Waterbodies

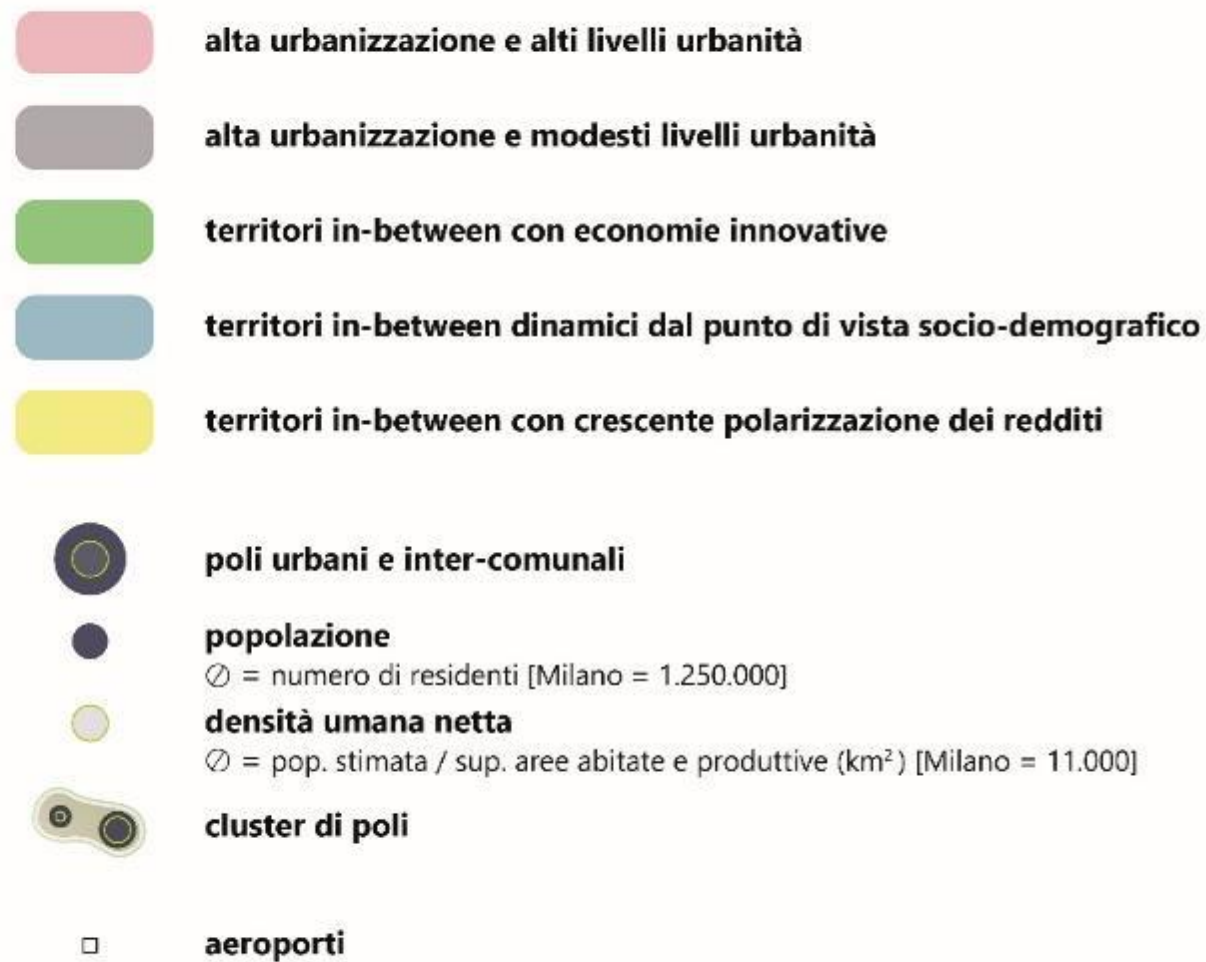

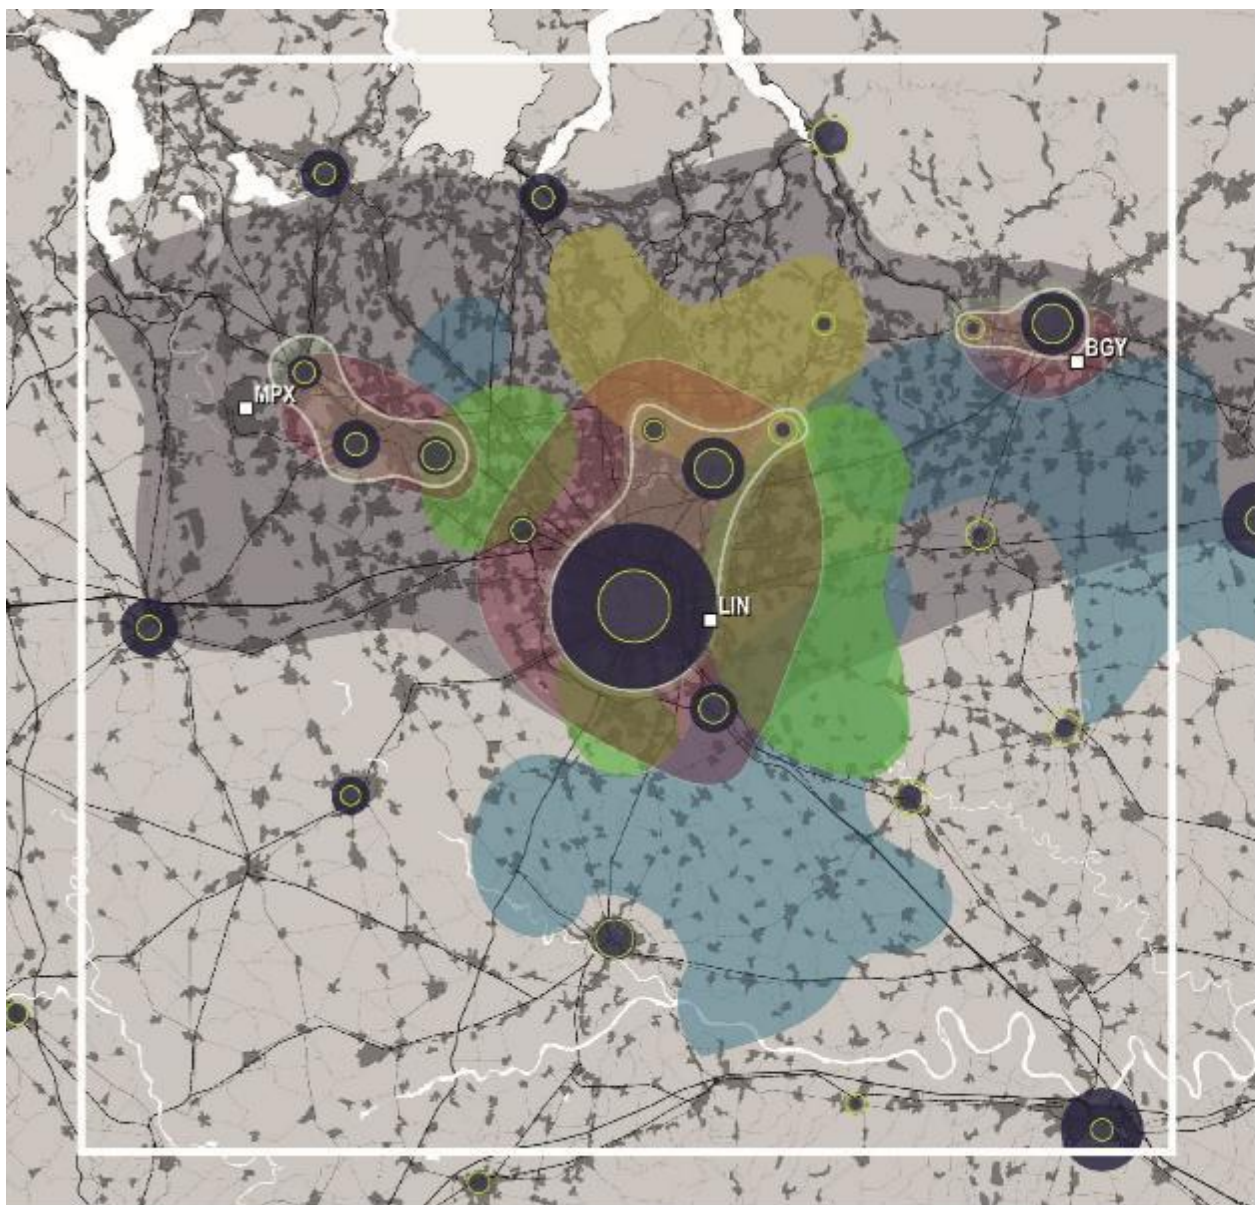

◻ Freight terminals

— Highways

— Freeways

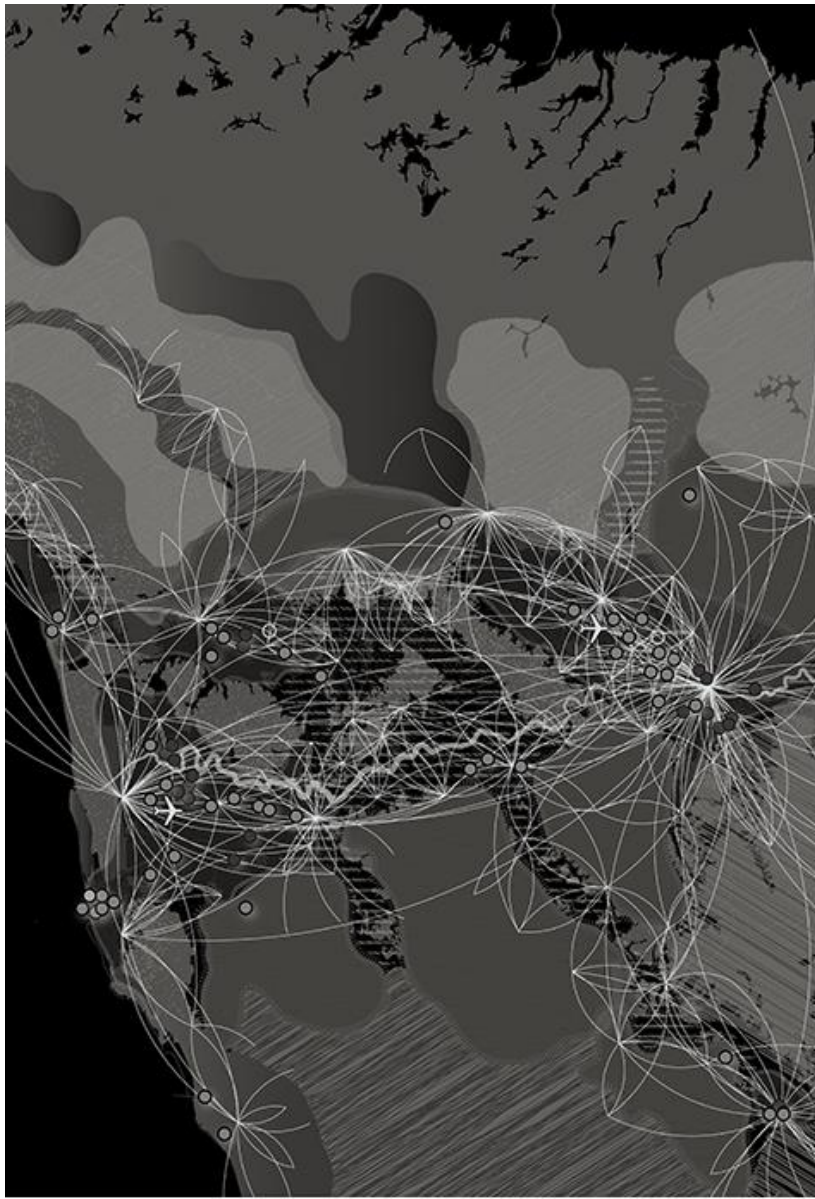

POST-METROPOLITAN PROCESSES AND TURISTIC OR INNER AREAS
